Before you start using PDF JobReady, you need to download and install the PDF JobReady software:

1. Before download, make sure your system runs on Windows® 2000 or Windows® XP, and you already have version 6 or 7 of Adobe® Reader® installed on your computer. These are required to run the PDF JobReady software.

2. To download the PDF JobReady software, go to the PDF JobReady page on our website and save the file to your desktop (this is a 12 MB file).
3. To ensure trouble-free installation, we recommend you restart your computer before you begin. Once rebooted, click on the PDF JobReady icon, and follow the on-screen prompts to install the software. The speed of your computer will determine the speed of the installation. You will be able to simply click through the setup, as the default settings will work for any system.

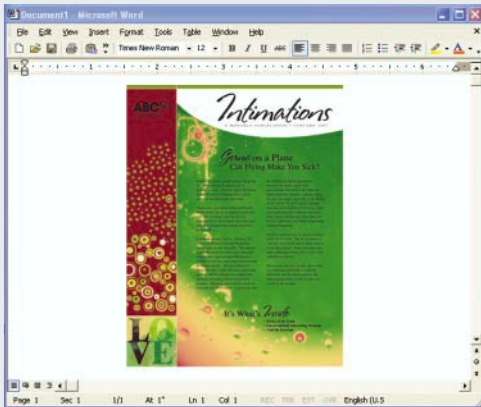

Your computer is now equipped with the PDF JobReady software and ready for PDF file creation:
